MEMORANDUM FOR ALL INSTALLATION DFC

FROM: A4SP
Integrated Defense Policy Division
1030 Air Force Pentagon, Rm 4A1076
Washington, DC 20330-1030

SUBJECT: Transition from ForcePro to Enterprise Protection Risk Management (EPRM) Tool

References:
   a. DoDI O-2000.16 Vol.1_AFI 10-245-O, *Antiterrorism (AT) Program Implementation*, 18 July 2017
   b. DoD Directive 3020.40, *Mission Assurance*, 11 September 2018
   c. AFPD 16-14, *Security Enterprise Governance*, 24 July, 2014
   d. AFI 31-101, *Integrated Defense* (ID), July 6, 2017

Purpose: Initiate the transition from ForcePro to EPRM for all future Security Forces (SF) assessments

Background: AFI 31-101 directs the designation of an approved automated Integrated Defense Risk Management Process (IDRMP) application to facilitate the Integrated Defense (ID) risk management process. The Air Force Security Enterprise Executive Board (AFSEEB) accepted the June 2017 SAF/MG recommendation that the Air Force adopt Enterprise Protection Risk Management (EPRM) as the tool for Security Forces (SF) assessments (Attachment 1). EPRM also has been designated as the DoD system of record for antiterrorism assessments and is the approved assessment tool within the DoD Mission Assurance Risk Management System (MARMS) federation of systems.

Discussion: The "DoD Antiterrorism" module of EPRM is based on the IDRMP construct. It was fielded in June 2018. Air Force commands began use of the module to satisfy their DoDI O-2000.16 v1 assessment requirements for antiterrorism. AF/A4S directed tests of the module at several Air Force installations to evaluate its ability to satisfy IDRMP requirements. AF/A4S identified many changes incorporated into the current module.

Action Required: EPRM is the approved application for Air Force Antiterrorism and IDRMP assessments, and effective 1 July 2019 all such assessments are to be entered in EPRM. EPRM is the mechanism the Air Force will use to satisfy requirements, and develop and sustain an enterprise security framework, per AFPD 16-14 and DoDD 3020.40. Air Force Security Forces may commence use of the DoD Antiterrorism module immediately to satisfy assessment requirements from AFI 31-101 (IDRMP) and DoDI O-2000.16 Vol.1_AFI 10-245-O. As stated above, effective 1 July 2019, SF units and personnel are required to conduct their annual IDRMP assessments using the EPRM tool and will no longer use ForcePro. Unit personnel who conduct IDRMP assessments must get an EPRM account; Attachment 2 provides the procedure to register for an EPRM account.

Air Force Guidance: AFI 31-101 is under revision to reflect the designation of the EPRM tool as the approved automated IDRMP application to facilitate the ID risk management process. Additionally, AFMAN 31-101, Volume 1, *Integrated Defense*, is currently in development and will include detailed, step-by-step guidance for IDRMP and utilization of the EPRM user handbook. Both AFI 31-101 and AFMAN 31-101, v1, are expected to publish by the end of May 2019. Until the publication of AFMAN 31-101, v1, the user handbook is available on the EPRM help site: http://eprmhelp.countermeasures.com.

Conclusion: We understand that as we transition from ForcePro to EPRM, there may be growing pains. During this transition period, my point of contact is Ms. Bridget Simpkiss (bridget.e.simpkiss.civ@mail.mil) at 703-545-9806 (DSN 865). If you have EPRM user support/guide questions, please use the EPRM helpdesk at EPRMhelp@alionscience.com or contact Ms. Raleigh Onks: Raleigh.A.Onks.ctr@mail.mil, 703.998.1620.

GLEN E. CHRISTENSEN, Colonel, USAF
Chief, Integrated Defense Policy Division
Directorate of Security Forces
