COMMON QUESTIONS ABOUT OUR WEBINARS

-Are recordings of these webinars posted anywhere?

Moving forward, our webinars will be recorded and posted on the EPRM Help site. The webinar provided in late July will not be posted but the next OPSEC webinar will be posted.

-Can you host webinars that align with work schedules OCONUS?

As we work on our training schedule, we will try to accommodate different time zones. If you cannot attend, we recommend watching the recorded session posted on the EPRM Help Site. Moving forward, the recorded webinar will be posted within 2 weeks of the live session.

-Can you host an ATFP/ISC/Other module webinar?

Yes, we plan to host webinars on our other modules in the coming months. We are currently focusing on OPSEC, then ATFP will be our next offering.

-I attended the OPSEC webinar on 29 July 2024, should I attend the next OPSEC webinar?

Of course you are welcome to join but the next webinar we will be covering the same topics as the previous one.

SURVEY RESULTS

Thank you for your candid feedback. The responses were valuable and varied. We have closed the survey. A general summary of the items most requested:

-Better vulnerability tracking

-An updated PowerPoint report (and tweaks to the other reports)

-Improved analytics within the tool

-A more intuitive interface/focus on ease of use

EPRM 90-DAY LOGIN REQUIREMENT

Guidelines stipulate that you must login to your EPRM account every 90 days to keep it active. If you do not login within that window, your account will move to a locked status. No data is lost when your account is locked. If you know your EPRM account has expired because you have not been on SIPR, please reach out to the EPRM User Support Team to have your account reactivated.

MARMS

The Antiterrorism Force Protection (ATFP) module in EPRM is being updated to include the 2023 DoD Benchmarks. The update is on track and is anticipated to be pushed to SIPR in early fall.

EPRM HELP – MODERNIZED SITE

In the last newsletter we mentioned that the EPRM Help Site has been updated; traffic has increased to the site, as a result. If you have ideas on what to add or change, please let us know. We want your input.

SEEKING VOLUNTEERS

As mentioned in previous newsletters, the modernization of EPRM will require testing and early implementers. If you would like to test the application and provide preliminary feedback, please send an email to our user support team and identify what module(s) you would be interested in testing. Preliminary testing is expected to begin in late summer/early fall. Feedback will be used to ensure the tool is meeting the needs of the field. If you already volunteered – thank you! We will be reaching out soon.
